CURRICULAR AREA: Technologies

Enterprise and Employability

The course has two areas/units of study:

Leadership an Introduction

In this unit you will gain knowledge and understanding of the skills and qualities required to be an effective leader. You will research various leadership styles and a selection of effective leaders. This will then allow you to evaluate your own potential for leadership.

Leadership in Practice

In this unit you will plan an enterprise activity, implement the activity which you have planned and then carry out a review of its success. This will involve leading the school coffee shop in addition to other enterprise events you would like to lead throughout the year.

Assessment:

For each unit you will gather evidence of your experiences in leading an enterprise project by completing logs, checklists, recording evidence, including photographs, PowerPoint presentations or interviews. You will write a report to show evidence of your knowledge of leadership.

This course may be right for you if:

- You enjoy working with and leading others, being creative, planning and organising and working on your own initiative.
- You are considering a future career which may have potential to manage or lead others.
- You want to develop and improve your communication skills and leadership skills.

Progression

If you are successful at this level, possible progression would be to:

- Business Management qualification
- Further Education - college course or university
- Employment in any sector or industry especially where you are working with others with the potential to manage or lead others.

Skills developed in this course

- **Team Working skills:** working collaboratively, with a group of people to achieve a common goal.
- **Leadership skills:** organising, inspiring and motivating a group of young people towards the achievement of a goal.
- **Problem Solving skills:** the ability to work through the details of a problem to reach a solution.
- **Project Management skills:** the process of planning, monitoring, and controlling, in relation to a particular project.
- **Time Management skills:** the ability to manage time and prioritise to be more productive and efficient in completing tasks.
